Separate & Colonia & Separate & Colonia & Separate & Colonia & Separate & Separ LATEST LONDON QUOTATIONS. WEDNESDAY, July 1. The preminence that the free-silver movert account, who realize the importance of the are also keenly alive to the sensitiveness of capital upon the currency question, have been unusually aggressive in their operations for several days past, and in various ways have political situation, irrespective of party, are of the opinion that the movement in favor of free silver will be overwhelmingly defeated next November. While Wall street regards the capture of the Chicago Convention by the freesilver element as assured, it apparently ignores certain important developments that may fol

to the maintenance of the gold standard. It is exceedingly gratifying that some Euopean dealers in American securities do not bare the seemingly unreasonable alarm that prevails in Wall street, but, on the contrary, ewing the situation dispassionately and at a stance, have been liberal buyers of stocks at recent decline in prices. This would seem indicate that a greater degree of confidence to the ultimate verdict of the American peoregarding their monetary standard exists ad than here. In view of the skepticism at is still expressed as to the genuineness of ent purchases of stocks by London through gn arbitrage houses, it seems pertinent to hat the houses referred to are unanimous statements that the bulk of the stocks

low such an event, and which may contribute

St. Paul by Saturday's steamers, and one banking house states that including the St. Paul it has bought for its London correspondent it will ship in the near future 20,000 shares of various stocks. The outward movement of securities is necessarily gradual, because of the work entailed upon the various transfer offices and be-

any particular steamer.

As foreshadowed in The Sun this morning, the Assay Office reduced its price for fine gold bars from an eighth to a tenth of 1 \$\mathbb{P}\$ cent., being a reduction of one-fortieth of 1 % cent. The purpose of this reduction is to induce experters of specie to take bars in preference to coin, at s premium which barely covers the cost of transporting the bars to the mint and bringing back the coin into which they may be converted, Gold coin to the amount of \$200,000 was withdrawn from the Sub-Treasury to-day for shipment to Germany to-morrow. This transaction must include a handsome commission to the banking house making the operation. One of the disturbing factors in the stock market today was a report that several millions of gold would be taken for export on Saturday. A careful canvass of the banking houses likely to make such shipments failed to disclose any basis for the report, As a matter of fact, inquiries regarding it elicited flat-footed denials in every case.

to-day was the failure of the directors of the American Tobacco Company to take any action regarding the payment of a quarterly dividend upon the company's common stock. It will be remembered, particularly by those foolish enough to speculate in the stock of this company, that the management passed the quarterber, some weeks in advance of the regular time for acting upon the dividend, and that it paid 2 W cant, in cash and 20 W cent, in scrip in May of this year. The scrip has not yet been redeemed, hence from a purely business point of view the negative decision of the directors not to declare a cash dividend upon the stock at this time would seem to be commendable. The record of the management of the American Tobacco Company during the last six months does not, however, warrant the assumption that its policy is governed in the slightest degree by business considerations, but entirely by the speculative exigencies of at least Street was liberally supplied with tips that a each dividend of 2 per cent, would be declared, but they falled to produce a rally in the stock, although the remainder of the list scored materially higher prices. This of itself was a suspicious circumstance, as noted in this column this morning, and it was not surprising that the stock began to decline from the opening, and at a recovery of 114 per cent. from the lowest price closed 224 per cent. lower than yesterday. This net fluctuation, in comparison with others in stocks more extensively dealt in, and possessing better known and greater intrinsic merit than American Tobacco, can hardly be regarded as measuring the disgust and indignati Wall street feels that the facilities of the Stock Exchange should be entirely at the service of the most unscrupulous gang of stock jobbers that has ever availed itself of those privileges. The feeling on the Exchange was the more in-tense because one of its members is a director and officer of the American Tobacco Company. The stock market as a whole was fairly active,

and at times very nearly demoralized, owing to the comparatively slight demand for stocks, even at material concessions in prices. London held aloof from the market in the early dealings, but at the extreme decline toward the close foreign arbitrage houses bought about 10,000 shares of various stocks, with the expectation of being able to dispose of them to advantage in London to-morrow morning. The heaviest trading was, as usual, in Sugar Refining, and it also sustained the greatest net loss, which was nearly 4 & cent. Manhattan Railway was also exceptionally weak, selling considerably under par, and closing 3% # cent. lower than yesterday. Other exceptionally weak stocks were Chicago Gas, Rock Island, General Electric, Northwestern, Chicago, Burlington and Quincy, St. Paul, and Louisville and Nashville. The two last named, however, owing to the demand for them from foreign arbitrage dealers, sustained net losses below the average of the stocks more extensively dealt in Of the so-called inactive shares it is impossible to speak in detail. The market for many of them reflected urgent liquidation, while others were either neglected or showed a confiding feeling on the part of those most largely interested in them. The indications are that while there was a good deal of liquidation today, it was less extensive than 'on Monday, and that operations for short account supplied a larger proportion of the transactions than on that day. The closing was in the main heavy,

The Columbus and Hocking Coal and Iron Company deposited with the Central Trust Company deposited with the Central Trust Company to-day the money necessary to pay the coupons on its first mortgage bonds due to-day. The Trust Company, however, made no payments on account of the coupons because it had been advised by its counsel and also by counsel to Bondhoiders' Committee not to pay out the money until after the adjourned hearing in the foreclesure proceedings on July 6. That hearing was adjourned from April 28 to the date mentioned "in order to see whether the payment of the July 1.1896, installment of interests shall be paid or defaulted." As the money has been paid to the trustee, the company is not in default. Practically the entire issue of bonds is controlled by the Bondhoiders' Committee. It is assumed that if the Court is informed on July 6 that the interests dae July 1 have been paid to the trustee, the application for the appointment of a receiver will be dismissed, and the sult will be discontinued unless it is retained simply to determine whether the defendant company is bound to pay the trustee's costs and expenses.
